-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

Applicant should ensure that (1) all reference characters in the drawings are described in the detailed description portion of the specification and (2) all reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Horn, et al. (US 6,105,490). Note, paddle massager (42) affixed to shaft (38). Thus, the features of the instantly rejected claims are structurally met by the reference.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by either one of Langen, et al. (US 4,432,650) or Peacock (US 5,603,567Z). The features of the instantly rejected claims are structurally met by either one of the references.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either one of Ludwig (US 5,405,630) or Leeds (US 6,279,328). Note, cooling jacket (20) of Ludwig and jacket (34) of Leeds. Thus, the features of the instantly rejected claims are structurally met by either one of the references.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Horn, et al. (US 6,105,490), Langen, et al. (US 4,432,650), Peacock (US 5,603,567Z), Ludwig (US 5,405,630) or Leeds (US 6,279,328). The prior art references disclose the claimed invention except for regulating the temperature in the vessel to ± 2 degrees F. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have regulated the temperature in the vessel of the prior art

to within ± 2 degrees F, since it has been held that the provision of adjustable ranges, where needed, involves only routine skill in the art. *In re Stevens*, 101 USPQ 284 (CCPA 1954).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents are cited for further teachings of devices whose structure is similar to that instantly disclosed.
